I DREAMT THIS DREAM

A Global Call for Peace and Unity

The #UniteOurVoice Movement info@tondreole.org

A GLOBAL FREQUENCY SHIFT

"I Dreamt This Dream: A Global Call for Peace and Unity" is an unprecedented collaborative music and documentary project inviting individuals from every corner of the earth to lend their voices, actions, and highest intentions to a single, ascending message.

In an era defined by deep societal fractures, a new global movement is utilizing the power of unified frequency to override division. The initiative centers on the principle that frequency is the only language the universe truly hears. While many participants are actively submitting videos of themselves reciting a shared spoken-word verse—which will be engineered into a monumental cinematic release—the physical voice is just one of many ways to fuel the movement.

The project acts as a digital sanctuary powered entirely by positive intent. True frequency is all-inclusive. Whether you are lending your spoken voice, supporting the movement's physical manifestation through our shop, or silently contributing a high-vibrational thought of peace, your intention is the action that drives us forward. No man, woman, child, or being is left out of this shared harmony.

THE ORIGIN: A DREAM AWAKENED

THE SEED

Every movement begins as a subtle frequency. For "I Dreamt This Dream," that transmission arrived in the heavy, fractured atmosphere of a post-9/11 world. In the midst of global uncertainty, Tondré Olé received a profound "dream download"—a vivid vision of a reality not yet manifested: a world entirely devoid of hatred, racism, poverty, and self-destruction.

THE EBB

"In my heart it exists for many years, My recollection, is now very clear."

As detailed in Tondré's framework, *From Chaos to Clarity: The Key to Navigating a Harmonious Life of Ebb & Flow*, all energy requires periods of dormancy to gather strength. The dream rested in the heart, waiting for the exact moment in human history when a critical mass of humanity would reach a vital shift in conscious awareness.

Mother Teresa once profoundly stated, "I will never attend an anti-war rally; if you have a peace rally, invite me." She understood the universal law that energy flows where attention goes—that fighting against what we fear only amplifies its frequency.

The dream rested until this exact tipping point in human history. Humanity is exhausted from fighting against what it does not want—from feeding the low-vibrational energy of resistance that no longer serves our highest good. "I Dreamt This Dream" emerges now to introduce a profound shift in perspective. We are no longer gathering to fight against division or give energy to the illusions that separate and keep us apart. Instead, we are choosing to leave the rift behind and heal humanity by uniting and rising above it entirely. As global fractures deepen, it is undeniable that a single artist's song is no longer enough to anchor this new paradigm. The world doesn't just need a melody; it needs intentional unity. Every soul who resonates with this message is invited to add their vibration for the highest good of humanity. No matter your path or walk of life, the moment your desires include the greater good of all, you are welcome here. We are all in this together, rising as one.

THE CATALYST

A dormant seed requires a catalyst. That spark arrived when Tondré witnessed the monks of the Hường Đạo Center embarking on their Walk for Peace. Seeing their physical embodiment of tranquil, unified intention served as a deep spiritual mirror and an undeniable signal. The dream could no longer wait. It had to be awakened, reimagined, and expanded far beyond a single artist's voice.

THE FLOW

Today, that post-9/11 dream has evolved into a multidisciplinary, socially engaged movement. By calling upon souls from every continent to unite their voices, we are weaving individual frequencies into a permanent cinematic testament to human unity. Out of many, We Are One.

THE ASCENDANT HERMETIC SOURCE NEXUS

Our Mission: To elevate the collective frequency of humanity by uniting individual voices from every corner of the globe. In doing so, we embody the Universal Law of As Above, So Below—healing our internal worlds to elevate the external collective, and manifesting a harmonious reality for all. Out of many, We Are One—aspiring to rise above hatred and division, anchor pure present awareness into the physical world, and build a living, cinematic testament to peace through Unity.

- **The Overlapping Circles (The Collective):** Each circle represents the person as an individual. Where they overlap in the middle is our shared humanity. Out of many, We Are One.
- **The Ascending Chevron (The Rising):** The rising symbol only exists in the space where the circles overlap. It means we can only elevate when we are united.
- **The Dual Diamonds (As Above, So Below):** The top diamond connects us to source energy, and the bottom diamond grounds that energy in the physical world. We elevate our inner frequency so we can elevate the Earth.

THE VISIONARY: TONDRÉ OLÉ

Spearheaded by Tondré Olé—an inspirational speaker, transformational life coach, singer-songwriter, and author of *From Chaos to Clarity*—the movement serves as the physical manifestation of his life's work.

Guiding purpose-driven people through growth, healing, and spiritual awakening, Tondré understands that frequency dictates reality. Operating from the understanding of the Hermetic principle "As Above, So Below," the project provides a tangible platform for individuals to align their inner frequency to elevate the Earth.

Whether illuminating the path through his writings or developing interactive tools like **The Clarity Compass**, his ultimate focus remains on anchoring pure present awareness into the physical world.
